- Frontend Developer

Projects

DripSide
- An artist-support platform enabling creators to sell their designs on customizable products like t-shirts.
- Integrated design editor for artists to create and preview designs on products before selling.
- Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js).

Forskor
- A restaurant food booking web application where users can browse and order food products online.
- User-friendly interface for browsing menu items, placing orders, and managing bookings.
- Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js).

SkoolGURU
- An innovative online education platform that offers high-quality, accessible, and affordable learning for students of all ages. The platform connects students with teachers to enhance skills and knowledge through interactive courses.
- Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js).

CoWorkspace
- A web application that allows users to easily book workspaces based on their location preferences.
- Key Features: Users can enter a location to view and book available workspaces in that area.
- Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js).

TransferFly
- A secure web application that allows users to share valuable assets like accounts, credentials, and other sensitive data. A broker intermediary ensures data is exchanged only when both the sender and receiver have confirmed the transaction.
- Secure data exchange, two-way confirmation, and broker-mediated transaction for added security.
- Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js).

Skills Summery

- **Languages :** English and Malayalam.
- **Design Tools :** Experienced with Figma, Adobe XD
- **Software :** ReactJs, React Native, NodeJs, Express, MongoDB, MySQL, AWS, IOT
- **Soft Skills:** Creative Designing, Leadership, Good Listener, Quick Problem Solving
